— La Idea
vs la realidad?

Planteamiento

Desarrollar una aplicación **multiplataforma** con los juegos 3 en raya y piedra papel tijera.

- + **tienda de puntos**
- + **base de datos**
- + **una web también, venga**
- + **integración y despliegue continuos**

DEBILIDADES

- Falta de conocimiento
- Que nos pueda dar todo el palo o trabajemos lento
- Comernos la cabeza de algo tan complejo

AMENAZAS

- Franja de tiempo limitada
- Creación de una IA para el juego
- Producto complejo

DA
FO

FORTALEZAS

- Nos sentimos bastantes seguros con este grupo
- Se acerca el veranito
- Los exámenes cuentan menos porcentaje / la nota motiva

OPORTUNIDADES

- Nos Sirve para un futuro o aprendizaje
- Volvernos ricos e ir a vivir a Japón
- Venderle el proyecto a META-AI

— Problem *vs solutions*

You can enter a subtitle
here if you need it

Problem

Mercury is the closest planet to the Sun and **the smallest one in the Solar System**. The planet's name has nothing to do with the liquid metal since it was named after the Roman messenger god, Mercury

Them

Mercury is the closest planet to the Sun and the smallest one in the Solar System—**it's only a bit larger than the Moon**. The planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god

Us

Venus has a beautiful name and is the second planet from the Sun. **It's terribly hot—even hotter than Mercury**—and its atmosphere is poisonous. It's the second-brightest natural object in the night sky after the Moon

Solution

Jupiter is a gas giant and the **biggest planet in the Solar System**. It's the fourth-brightest object in the night sky. It was named after the Roman god of the skies and lightning

— Case study

Challenge

Despite being red, Mars is actually a very cold place. It's full of iron oxide dust, which gives the planet its reddish cast

Results

Jupiter is a gas giant and the biggest planet in the Solar System. It's also the fourth -brightest object in the night sky

Solution

Venus has a beautiful name and is the second planet from the Sun. Venus is terribly hot, even hotter than Mercury
